

# ***THERE I WAS***

Let's learn from our experiences – not our mishaps

Did anything happen today that, if it happened tomorrow, may cause a mishap tomorrow?

After debriefing all potential mishap areas within the flight – let others learn from your experiences.

This is an avenue to let other pilots learn from your experiences. Safety will put this information into the flying safety newsletter on a regular basis. If it is something all ANG / AF / F-16 pilots need to know about – I'll tell them too.

If you don't want to fill this out but want to keep anonymous, call 1-800-237-9744 ext. 2-8530 and tell the ANGRC Safety Office.

**What scared you today?**

**Why did it happen?**

**How can we prevent it from happening again?**

Please put in a holey-joe and address to "SE" (Safety) / LTC Mike Maier
